SPONSORED BY THE
 Federal Ministry
of Education
and Research

This project has received funding from the European Union under grant agreements No 101102412 and the European Union's Horizon 2020 research and innovation programme under grant agreements No 870628, No 101015924.

SHARE Research Data

- 27 European countries + Israel
- Population 50+
- Multidisciplinary: demography, health, family and social networks, employment and pension, finance, etc.
- Free access for persons with scientific affiliation (scientists, students, etc.)

Data access

- Fill out the following user statement and send it to share-rdc@centerdata.nl:

https://share-eric.eu/fileadmin/user_upload/pdf_documentation/SHARE_Data_Statement.pdf

- You will get access within a few days (please also check your spam folder)
- Download the data at:
<https://releases.sharedataportal.eu/>
- Please read the **Release Guide**:
<https://share-eric.eu/data/data-documentation/release-guides>

Research Data Center

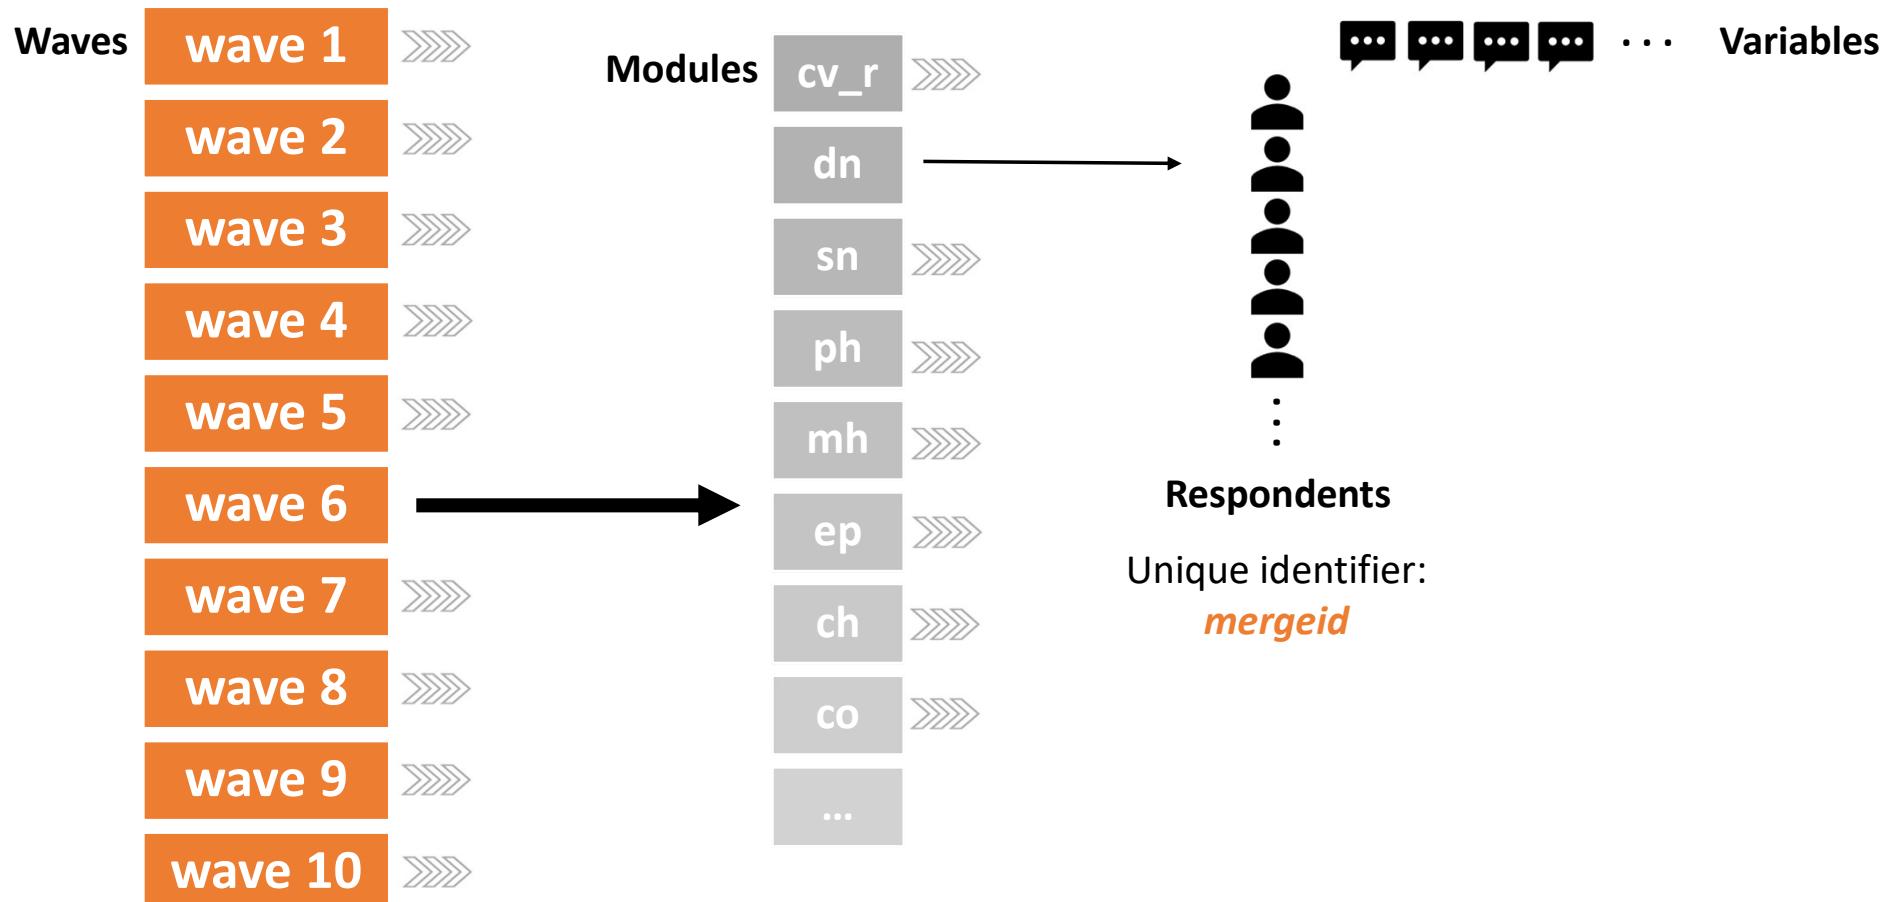

- The latest data release should be used
- Different waves, different data sets
- Stata, SPSS
- easySHARE for teaching available in R

SHARE Research Data Center

Releases

Release	Stata	SPSS	R
SHARE HCAP 1 Release 1.0.0 DOI: 10.6103/SHARE.HCAP1.100 Released: 5 February 2025	sharew9_rel1-0-0_hcap_stata.zip (1.65MB)	sharew9_rel1-0-0_hcap_spss.zip (1.62MB)	No R file available
SHARE Dried Blood Spots Release 1.0.0 DOI: 10.6103/SHARE.w6.DBS.100 Released: 29 May 2024	sharew6_rel1-0-0_dbs_stata.zip (6.17MB)	sharew6_rel1-0-0_dbs_spss.zip (6.70MB)	No R file available
easySHARE Release 9.0.0 DOI: 10.6103/SHARE.easy.900 Released: 11 June 2024	easySHARE_rel9-0-0_stata.zip (24.51MB)	easySHARE_rel9-0-0_spss.zip (33.84MB)	easySHARE_rel9-0-0_R.zip (22.92MB)
Wave 9 Release 9.0.0 DOI: 10.6103/SHARE.w9.900 Released: 28 March 2024	sharew9_rel9-0-0_ALL_datasets_stata.zip (77.57MB)	sharew9_rel9-0-0_ALL_datasets_spss.zip (78.76MB)	No R file available
Wave 9 COVID-19 Survey 2 Release 9.0.0 DOI: 10.6103/SHARE.w9ca.900 Released: 28 March 2024	sharew9ca_rel9-0-0_ALL_datasets_stata.zip (12.38MB)	sharew9ca_rel9-0-0_ALL_datasets_spss.zip (14.56MB)	No R file available
Wave 8 COVID-19 Survey 1 Release 9.0.0 DOI: 10.6103/SHARE.w8ca.900 Released: 28 March 2024	sharew8ca_rel9-0-0_ALL_datasets_stata.zip (16.75MB)	sharew8ca_rel9-0-0_ALL_datasets_spss.zip (20.29MB)	No R file available
Wave 8 Release 9.0.0 DOI: 10.6103/SHARE.w8.900 Released: 28 March 2024	sharew8_rel9-0-0_ALL_datasets_stata.zip (73.88MB)	sharew8_rel9-0-0_ALL_datasets_spss.zip (85.59MB)	No R file available
Wave 7 Release 9.0.0 DOI: 10.6103/SHARE.w7.900 Released: 28 March 2024	sharew7_rel9-0-0_ALL_datasets_stata.zip (72.57MB)	sharew7_rel9-0-0_ALL_datasets_spss.zip (87.81MB)	No R file available

Questionnaire (1)

- Main questionnaire is harmonized across countries and waves
- Country specific-national add ons, so called drop off questionnaires
- All questionnaires can be downloaded in national languages and English at:
<https://share-eric.eu/data/data-documentation/questionnaires>
- **Types of interviews:**
 - Standard main questionnaire
 - End-of-Life questionnaire: For dependants of deceased respondents about the last year of life
 - SHARELIFE: Life history interviews (wave 3 and partly 7)
 - SHARE Corona Survey

Questionnaire (2)

- **Types of respondents:**

- There are different types of respondents in a household: Family respondent and financial respondent – some questions are only asked to one person in the household
- Proxy respondents: If a persons cannot answer because of a health problem for example, a proxy interview is allowed. A proxy answers the whole or parts of the questionnaire for the respondent.

IF [PH041_UseGlasses](#) = a1

How to merge SHARE modules?

- If you work with regular SHARE data you have to decide which modules you want to merge and which waves you need
- Even if you only want to do a cross-sectional analysis of one wave it is always recommended to merge at least demographic information of all previous waves because in the longitudinal sample some questions are only asked during the first interview
- There are also modules with generated variables like health, housing and financial indicators which you should always consider
- When working with different waves always check for changes in questionnaire for the variables used

Stata code example: Merging SHARE modules for one wave

```
Untitled.do* x
1  /*FIRST SET PATHS and DATA RELEASE*/
2  local Path: display "D:\FOLDER\FOLDER\Datens" /*Path to SHARE release data*/
3  local savePath: display "D:\FOLDER\FOLDER\Save" /*Path to save generated files*/
4  local release: display "rel9-0-0" /*Data release*/
5
6  *** WAVE 4 ***
7
8  cd "`Path'"
9  local wave: display "4"
10 clear all
11 use "sharew`wave'_`release'_ALL_datasets_stata\sharew`wave'_`release'_cv_r.dta", clear
12
13 *** MERGE MODULES: /*CHOOSE MODULES*/
14 foreach i in dn br gv_isced gv_housing gv_health ph gv_weights {
15     merge 1:1 mergeid using "sharew`wave'_`release'_ALL_datasets_stata\sharew`wave'_`release'_`i'.dta"
16     rename _merge merge_`i'
17 }
18
19 foreach var of varlist _all { /*add the wave info to the variable name*/
20     rename `var' w`wave'`var'
21 }
22 rename w`wave'mergeid mergeid
23
24 save "`savePath'\base_w`wave'`release'.dta", replace
```

After merging necessary modules for one wave, merge alle waves (code example)

- After merging all necessary modules of a wave, merge all datasets. The result is a dataset in wide format with a variable for each wave

→ merge all files from the folder

```
18  /*MERGE ALL WAVES*/
19
20  cd "`savePath'"
21  pwd
22
23  local files : dir "`savePath'" files "*`release'.dta"
24  foreach file in `files' {
25    dis "`file'"
26    merge 1:1 mergeid using "`file'", force
27    drop _merge
28  }
29
```

Code to copy into a Stata dofile

```

/*FIRST SET PATHS and DATA RELEASE*/
local Path: display "D:\FOLDER\FOLDER\Datén" /*Path to SHARE release data*/
local savePath: display "D:\FOLDER\FOLDER\Save" /*Path to save generated files*/
local release: display "rel9-0-0" /*Data release*/

*** WAVE 4 ***

cd "`Path'"
local wave: display "4"
clear all
use "sharew`wave'_`release'_ALL_datasets_stata\sharew`wave'_`release'_cv_r.dta", clear

*** MERGE MODULES: /*CHOOSE MODULES*/
foreach i in dn br gv_isced gv_housing gv_health ph gv_weights {
    merge 1:1 mergeid using "sharew`wave'_`release'_ALL_datasets_stata\sharew`wave'_`release'_`i'.dta"
    rename _merge merge_`i'
}

foreach var of varlist _all { /*add the wave info to the variable name*/
    rename `var' w`wave'`var'
}
rename w`wave'mergeid mergeid

save "`savePath'\base_w`wave'`release'.dta", replace

```

Code to copy into a Stata dofile (2)

```
/*MERGE ALL WAVES*/  
  
cd "`savePath'"  
pwd  
  
local files : dir "`savePath'" files "*`release'.dta"  
foreach file in `files' {  
    dis "`file'"  
    merge 1:1 mergeid using "`file'", force  
    drop _merge  
}
```

Tip: Run code as a whole!

Any questions?
